Subject: FW: Catchment Model Presentation - Henry He's White Paper and ERT Memorandum
Attachments: Desktop Catchment Water Modeling Henry He DB.docx

I am going to be setting up a presentation on the desktop catchment water modelling for my site teams at Barker Hughesville and Carpenter Snow Creek on Friday December 11 in the afternoon. Given that you anticipate an extensive groundwater investigation at the Columbia Falls Aluminum Smelter, you might find value in the presentation since it is geared toward sites that are in the initial stages of investigation. Take a look at the attached word document. If it is of interest, let me know your availability in the afternoon on the 11th and I will be sure to extend an invitation to you.

Also attached a non-site specific UFP-QAPP we have developed for the approach.
